Prestone®

Quality Since 1927

Prestone® Power Steering Fluid was developed for use in GM®, Ford®, Chrysler®, and most foreign cars and light trucks. See vehicle owner's manual. Formulated to help protect modern power steering systems against pump breakdown and squeals caused by wear, oxidation, and foaming. Pours at sub-zero temperatures to help assure cold weather steering performance.

DIRECTIONS: With engine off, fill power steering reservoir to level specified in vehicle owner's manual. Do not overfill, as system damage may occur. After using product, always wash exposed skin thoroughly with soap and water.

GM® is a registered trademark of General Motors LLC. FORD® is a registered trademark of Ford Motor Company. CHRYSLER® is a registered trademark of FCA US LLC.
