To: All Concerned Parties

Performance Friction Corp. hereby states all friction compounds currently produced are compliant with the Washington Better Brakes Law, the California Hazardous Materials: Motor Vehicle Brake Friction Materials legislation and contain no ingredients listed on the Proposition 65 List. All compounds have been tested and registered with official test labs and registrars for copper compliance.

In addition to meeting all copper regulations, all Carbon Metallic brake pads contain:

- No Antimony
- No Asbestos
- No Lead
- No Cadmium
- No Chromium
- No Potassium Titanate

Performance Friction's mission is to deliver the absolute best brakes on the market without the use of harmful substances.

Please contact our offices if you have further questions.

Regards,
